

## Designated Occupant Position Diagrams

The following diagrams identify the designated occupant positions for KingFisher models under 26ft. (7.92m) in length. These positions indicate the locations where passengers may be seated or standing while the vessel is underway. For safe operation, occupants should remain within these designated areas whenever the boat is in motion and must not occupy areas not specifically designated for passengers. Always observe the maximum person capacity and operating recommendations provided in your owner's manual.
